

July 4, 2025

To Whom It May Concern,

It is with great enthusiasm that I write this letter of recommendation for **Nithun Sundarrajan**, who worked closely with me during his tenure as an **AI/ML Intern at Hiron AI** from **June 9, 2025, to July 4, 2025**. During this period, I had the privilege of mentoring Nithun, and I can say with full confidence that he is among the most exceptional and driven individuals I have had the pleasure of working with.

From day one, Nithun demonstrated a rare blend of intellectual curiosity, technical skill, and unwavering determination. Despite the brevity of his time with us, his impact was nothing short of remarkable. He actively contributed to cutting-edge projects focused on **Generative AI, Machine Learning model optimization, and AI-driven product development**, quickly mastering complex concepts and consistently exceeding expectations.

What sets Nithun apart is his ability to combine **technical proficiency with strategic thinking**. He doesn't just build models, he understands the why behind them. His capacity to grasp advanced topics like **LLM fine-tuning, Retrieval-Augmented Generation (RAG) systems, and model deployment pipelines** was outstanding. In fact, several of his ideas during brainstorming sessions pushed our team toward more innovative and scalable solutions.

Beyond his technical strengths, Nithun is also a fantastic collaborator. He communicates effectively, asks insightful questions, and consistently shows humility paired with confidence. His work ethic is unmatched, often going above and beyond his assigned responsibilities, voluntarily researching, experimenting, and delivering high-quality outcomes under tight timelines.

I have no doubt that Nithun will thrive in any high-stakes, fast-paced environment he chooses to enter. He has the mindset, skill set, and drive to become a future leader in the fields of **AI, Quantitative Finance, or Deep Tech innovation**.

Without hesitation, I wholeheartedly recommend Nithun Sundarrajan for any opportunity he pursues. Any organization would be incredibly fortunate to have him on their team.

Should you require further information, please feel free to contact me.

Sincerely,
Ankit Kumar
Director, Hiron AI
